training

Training for
those working
in Hull and
East Riding

FREE oral health training programme

City Health Care Partnership CIC's Oral Health Promotion Team is pleased to offer a FREE oral health training programme. This can be delivered in-house or at a central location.

Aims are to:

- Increase awareness of oral health education for professionals and staff who work with babies and young children
- To promote and maintain good oral health regimes for families who access services

Learning Outcomes are to:

Identify

- Key oral health messages relevant to professionals/staff that provide oral health advice to parents of babies and young children
- Relevant best practice guidance relating to oral health to support professionals/staff to provide oral health advice
- Signs, symptoms and management of teething

Describe

- Methods of cleaning deciduous (baby) teeth

Discuss & Advise

- Healthy eating and drinking habits
- Fluoride products on the market
- Dental visits for young children
